

# GRANDÉ ROUX FALCON

06/01/2018

• Still growing • Dark Bay

Falcon is the first foal out of this young broodmare by Rotspoon. He is a modern type with expressive movement, just as his sire Firestone. He is very correct and well put together.

Falcon is one of the friendliest foals we have ever worked with which we believe descends from the Rotspoon line, his foals being known for their great rideability.

He is a third generation foal from our stud which means he is bred from at least three generations of international bloodlines.
